

ATTENTION: TUFF POOL & SOFT-WALL POOL CUSTOMERS

This is an addendum to the instructions enclosed with this F-1000 ladder. Use the enclosed clamps and/or straps to attach the ladder to the pool, instead of Step #7 of the F-1000 Instructions Sheet.

**DO NOT DRILL OR SCREW ANYTHING TO
THE TOP RAIL OF THE POOL!**

RECTANGLE & VIEW POOLS:*

Enclosed are two clamps, which will snap directly to the top-rail of the pool. Attach the two clamps to the bottom of the Platform (#2 on F-1000 Instruction Sheet) using the bolts (#8 included in the ladder hardware kit). Again this is in place of Step #7 of your F-1000 Instruction Sheet. See pictures below... (*You may use the strap kit seen below in addition to the clamps for an even more secure install)

ROUND POOLS:

Enclosed are two straps, which attach to the struts of the pool. Attach the two straps through the slots on the Platform (#2 on F-1000 Instruction Sheet) then place the ladder between any two struts, wrap around the strut and secure in place with buckles. Again this is in place of Step #7 of your F-1000 Instruction Sheet.

If you have any questions
regarding attaching the
ladder to your Tuff Pool
